

BOOMPODS[®]

Boompods is the only consumer electronic company making products from 100% ocean bound plastic.

OCEAN MATERIAL

Products made with a future.

But how is this possible? I mean, this was plastic waste!

Yes. But when it comes to the most common used materials we're collecting, for instance PET bottles, this waste already had food grade during its first lifecycle. After collecting it, our local teams are washing and sorting the plastic which is then shredded into flakes. After this step, the innovative technology we have developed with the Swiss University of Applied Sciences OST, takes over: We transform these flakes into pellets in a pure mechanical process, neither chemicals nor virgin plastics are being added. We use the latest technology and apply physical methods (vacuum, decompression, degassing, melting) to transform waste and extend the molecular chains of these wasted polymers. The result is a strong, clean and reliable material.

Planet Boompods

The purchase of a Boompods product helps plant one tree.

We are very proud to announce that Boompods has partnered with One Tree Planted, to plant trees around the world. One Tree Planted is a non-profit organisation dedicated to global reforestation. Their mission is to reforest the planet, one tree at a time.

Trees clean our air and water, create habitats for biodiversity, contribute to our health and wellbeing, and create jobs for social impact. We're honoured to have reforestation through One Tree Planted as an integral part of our business model.

Designing the future.

Our packaging is now 100% plastic free and from responsible sources. We tackled this as a design problem and have come up with stronger and even more attractive packaging that is easily recycled and helping a greener future.
